Projector Connector Type B Transmitter

\$175.00

The **Point-To-Point Projector Connector Type B Transmitter** allows you to simultaneously send a VGA Signal (up to 1280x1024) and a Stereo Audio Signal (3.5mm) to a video projector while only using 1 piece of UTP (Unshielded Twisted Pair) or STP (Shielded Twisted Pair) CAT5e or CAT6e cable. The system is precisely tuned to send a picture perfect image and stereo audio to the projector.Â Extends any VGA or high definition component display and analog L+R audio device up toÂ 300 Meters*. This 4:3 and 16:9 aspect ratio transmitter can send Audio/Video to one or more VBS Suiteâ„¢ Type B Receivers. Perfect for classroom and digital signage applications.

* The specific Type B Receiver purchased to go with the Transmitter will determine the supported cable distance.Â The Standard Type B Passive Receivers are available for STP cables up to 60M, and the the Extended Distance Type B Receiver is available to support cables up to 300M (1000').

Transmitter Specifications:

Inputs â€“ VGA * 1 (PC or Laptop), Stereo Audio * 1 (3.5mm mini-plug)

Outputs â€“ VGA * 1 (Local Computer Monitor), Stereo Audio * 1 (headset or desktop speakers)

Power â€“ 12V DC Adapter is included with Transmitter

Connectivity â€“ 1 Shielded RJ45 port (Shielded Twisted Pair cable recommended)
